

# FLIR ONE PRO Compattibility

## iOS Device Compatibility

Model	Comments
iPhone SE iPhone 7 / iPhone 7 Plus iPhone 6 / iPhone 6 Plus	Accessory has been designed to connect specifically to these models, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod, iPhone, or iPad may affect wireless performance.
iPad / iPad Mini	With the new OneFit™ feature on both devices, the connector will adjust up to an additional 4 mm in length. This length is compatible with most protective cases, so you don't have to choose between thermal vision and safeguarding your device. We have not tested all cases, but have picked many of our favorites. The 4-mm extension will not complete a connection through the Lifeproof and Otter Box Defender cases, but we offer an extender for purchase in the shopping cart.
Will it work with my phone case?	

## Android Device Compatibility

To be compatible with FLIR ONE or FLIR ONE Pro, the mobile device must have a USB-C connector.

Model	Comments
Google Pixel	To be compatible with FLIR ONE, a device must meet the minimum requirements and appear on the list below as a compatible device.
Google Pixel XL	
Google Nexus 6P	
Samsung Galaxy S8	Minimum Requirements:
Samsung Galaxy S8+	
	<ul style="list-style-type: none"> <li>• At least Android Version 5.0.0</li> <li>• GPS, Location, OTG USB, Flashlight, and Microphone Capabilities</li> </ul>
