

The Falcon

Your glove should be as durable as your turnout gear.
Introducing the **Falcon**—the most dexterous and long-lasting fire glove you can buy today.

FireCraft combined the toughest (and softest) leather—kangaroo—with TenCate's new Kombat™ Flex fabric containing PBI® to produce a truly unique structural fire glove.

NEW!

- **Greater flexibility**
- **Longer lasting**
- **Enhanced thermal protection**
- **Designed to conform to the new NFPA sizing protocol**
- **Lifetime warranty on workmanship**

The Falcon Structural Fire Glove - SPECIFICATIONS

Kangaroo leather combines the best features of all leathers; it is the longest lasting and most flexible leather available. FireCraft has combined this extraordinary leather with TenCate's premium fabric used as the tough outer layer in turnout gear, Kombat™ Flex, featuring PBI.

The Falcon Glove from FireCraft: Longer lasting, better protection, enhanced safety.

Features and benefits found only in The Falcon structural fire glove:

- Designed as the tough yet flexible outer shell for premium turnout gear, TenCate's Kombat™ Flex fabric with PBI provides superior protection for the back of your hand and flexes easily.
- Our proprietary Phoenix kangaroo leather on the palm is the strongest leather available. No initial 'break-in' required and this leather is lightweight to reduce hand fatigue.
- The full fourchette pattern for the fingers assures a better fit and greater dexterity.
- We added rolled leather components to the back of the fingers to further enhance the remarkable dexterity of this Falcon glove.

The Falcon Glove: lighter, stronger, a step up in dexterity and protection. Because this glove will last longer than others, it is economical to buy. Plus FireCraft provides a lifetime warranty on workmanship. It is that good.

The Falcon is a high-end structural fire glove constructed from premium materials:

- Outer shell: kangaroo grain leather on the palm, premium grain bovine leather on back
- Durable, non-pilling double layer Nomex® inner lining
- TenCate's Kombat™ Flex covers the back of the hand for that extra shield of protection
- Exclusive rolled leather on the fingers and thumb to reduce fatigue and increase dexterity
- Full fourchette finger pattern enhances dexterity and also reduces hand fatigue
- The Porelle® moisture barrier that will outlast the rest of the glove – sewn and taped to the inner parts of the glove to prevent any inversion – guaranteed for the life of the glove
